The \texttt{settobox} package

Heiko Oberdiek
<heiko.oberdiek at googlemail.com>
2008/08/11 v1.4

Abstract
Commands are defined for getting box sizes similar to \LaTeX{}'s \texttt{settowidth} commands.

6 Index 8

1 Usage

1.1 Get box dimensions

\begin{verbatim}
\settoboxwidth{⟨\LaTeX{} length⟩}{⟨\LaTeX{} box⟩}
\settoboxheight{⟨\LaTeX{} length⟩}{⟨\LaTeX{} box⟩}
\settoboxdepth{⟨\LaTeX{} length⟩}{⟨\LaTeX{} box⟩}
\settoboxtotalheight{⟨\LaTeX{} length⟩}{⟨\LaTeX{} box⟩}
\end{verbatim}

A \LaTeX{} box is allocated by \texttt{\newsavebox}. It can be filled by \texttt{\sbox} or the environment \texttt{lrbox}. The commands above extract then the desired lengths.
1.2 Set box dimensions

\setboxwidth{⟨LATEX box⟩}{⟨LATEX length expression⟩}
\setboxheight{⟨LATEX box⟩}{⟨LATEX length expression⟩}
\setboxdepth{⟨LATEX box⟩}{⟨LATEX length expression⟩}

These commands allow the manipulation of the box. Package calc is supported in the ⟨LATEX length expression⟩. Also the following length are available in this expression:

\width width of the box
\height height of the box
\depth depth of the box
\totalheight totalheight of the box

Note, the base point (point at the left margin of the baseline) always remain constant.

1.3 Move box

\setboxmoveleft{⟨LATEX box⟩}{⟨LATEX length expression⟩}
\setboxmoveright{⟨LATEX box⟩}{⟨LATEX length expression⟩}
\setboxlower{⟨LATEX box⟩}{⟨LATEX length expression⟩}
\setboxright{⟨LATEX box⟩}{⟨LATEX length expression⟩}

Note, the box is shifted relative to the base point. The base point is always inside the box, however the width and height of the box change along with the movement.

1.4 Example

1.4.1 Short example

\newsavebox{\mybox}
\newlength{\mylength}
\sbox{\mybox}{Hello World}
\settowidth{\mylength}{\mybox}

1.4.2 Test file that shows box manipulations

1 \*{example}
2 \textless END
3 \documentclass{article}
4 \usepackage{settobox}
5 \usepackage{calc}
6 \newsavebox{\mybox}
7 \setlength{\fboxsep}{0pt}
8 \setlength{\parindent}{20pt}
9 \setlength{\parskip}{10pt}
10 \pagestyle{empty}
11 \% \texttt{\textbackslash test\{#1\}}
12 \% The macro is called with commands in #1 that manipulates
13 \% the box \texttt{\mybox}. These commands along with the result of
14 \% the manipulation is shown. Thus the essence of the
15 \% macro is:
16 \% a) \sbox{\mybox}{The cracy fox.}
22 \% b) #1 \% manipulates \mybox
23 \% c) Print #1 commands.
24 \% d) Print box with frame
25 \%
26 \% The implementation looks more weird:
27 \makeatletter
28 \newcommand*{\test}[1]{%
29 \par
30 \begingroup
31 \raggedright
32 \edef\x{\detokenize{#1}}%
33 \let\do\@makeother
34 \dospecials
35 \catcode`\-=10\relax
36 \catcode`\~=10\relax
37 \def{-}{1}%
38 \noindent
39 \texttt{\scantokens\expandafter{\x}}%
40 \par
41 \begingroup
42 \let~\relax
43 \sbox\mybox{The crazy fox.}#1%
44 \hbox{\usebox\mybox}---B%
45 \endgroup
46 \par
47 \endgroup
48 \par
49 }
50 \makeatother
51 \begin{document}
52 \test{\setboxwidth{\mybox}{1.25\width}}
53 \test{\setboxheight{\mybox}{0pt}}
54 \test{\setboxdepth{\mybox}{\height}}
55 \test{\setboxmoveleft{\mybox}{5pt}}
56 \test{\setboxmoveright{\mybox}{0.5\width}}
57 \test{\setboxmoveleft{\mybox}{5pt}}
58 \test{\setboxmoveright{\mybox}{5pt}}
59 \end{document}
60 \%END
61 ⟨/𭖾𭗑𭖺𭗆𭗉𭗅𭖾⟩

The result:

\setboxwidth {\mybox}{1.25\width}
A——The crazy fox.——B
\setboxheight {\mybox}{0pt}
2 Implementation

Package identification.
\NeedsTeXFormat{LaTeX2e}
\ProvidesPackage{settobox}[2008/08/11 v1.4 Assign box dimensions to length registers (HO)]
\newcommand*{\settoboxwidth}[2]{\setlength{#1}{\wd#2}}
\newcommand*{\settoboxheight}[2]{\setlength{#1}{\ht#2}}
\newcommand*{\settoboxdepth}[2]{\setlength{#1}{\dp#2}}
\newcommand*{\settoboxtotalheight}[2]{\setlength{#1}{\ht#2}\addtolength{#1}{\dp#2}}
\settoboxwidth
\newcommand*{\setboxheight}{2}\% \setboxzeroht{#1}{#2}\%}

\setboxheight
\newcommand*{\setboxdepth}{2}\% \setboxzerodp{#1}{#2}\%}
\setboxmoveleft
\newcommand*{\setboxmoveleft}{2}\% \setboxzerowd{#1}{#2}\%}
\setboxmoveright
\newcommand*{\setboxmoveright}{2}\% \setboxzerowd{#1}{#2}\%}
\setboxlower
\newcommand*{\setboxlower}{2}\% \setboxzerowd{#1}{#2}\%}
\setboxraise
\newcommand*{\setboxraise}{2}\% \setboxzerowd{#1}{#2}\%}
\settoobo@leng\th The work for the \setbox... commands is done by \settoobo@leng. Inside the length expression \width, \height, \depth, \totalheight are set to the dimensions of the box.

#1: the property of the box that is to be changed (\wd, \ht, \dp)
#2: the box
#3: length expression
\def\settobox@leng\th#1#2#3{\% \settobox@calc{#2}{#3}{#1#2=##1sp\relax}\%}
\settobox@lengh\th
\def\settobox@leng\th#1#2#3{\% \settobox@calc{#2}{#3}{\setbox#2=\hbox{\kern#1##1sp\copy#2}}\%}
\settobox@lengh\th
\def\settobox@leng\th#1#2#3{\% \settobox@calc{#2}{#3}{\setbox#2=\hbox{#1##1sp\copy#2}}\%}
\settobox@calc
\def\settobox@calc#1#2#3{\% \begingroup \def\width{\wd#1}% \def\height{\ht#1}% \def\depth{\dp#1}% \dimen@\ht#1\relax \advance\dimen@\dp#1\relax \def\totalheight{\dimen@}% \setlength{\dimen@}{#2}\% \count@\dimen@ \def\x#1{\endgroup}
\def\x#1{\endgroup}
3 Installation

3.1 Download

Package. This package is available on CTAN:\footnote{ftp://ftp.ctan.org/tex-archive/}

Bundle. All the packages of the bundle ‘oberdiek’ are also available in a TDS compliant ZIP archive. There the packages are already unpacked and the documentation files are generated. The files and directories obey the TDS standard.

CTAN:install/macros/latex/contrib/oberdiek.tds.zip

TDS refers to the standard “A Directory Structure for \TeX{} Files” (CTAN:tds/tds.pdf). Directories with \texttt{texmf} in their name are usually organized this way.

3.2 Bundle installation

Unpacking. Unpack the \texttt{oberdiek.tds.zip} in the TDS tree (also known as \texttt{texmf} tree) of your choice. Example (linux):

\begin{verbatim}
unzip oberdiek.tds.zip -d ~/texmf
\end{verbatim}

Script installation. Check the directory TDS:scripts/oberdiek/ for scripts that need further installation steps. Package \texttt{attachfile2} comes with the Perl script \texttt{pdfatfi.pl} that should be installed in such a way that it can be called as \texttt{pdfatfi}. Example (linux):

\begin{verbatim}
chmod +x scripts/oberdiek/pdfatfi.pl
cp scripts/oberdiek/pdfatfi.pl /usr/local/bin/
\end{verbatim}

3.3 Package installation

Unpacking. The \texttt{.dtx} file is a self-extracting \texttt{docstrip} archive. The files are extracted by running the \texttt{.dtx} through plain \TeX{}:

\begin{verbatim}
tex settobox.dtx
\end{verbatim}

TDS. Now the different files must be moved into the different directories in your installation TDS tree (also known as \texttt{texmf} tree):

\begin{verbatim}
settobox.sty   → tex/latex/oberdiek/settobox.sty
settobox.pdf   → doc/latex/oberdiek/settobox.pdf
settobox-example.tex → doc/latex/oberdiek/settobox-example.tex
settobox.dtx   → source/latex/oberdiek/settobox.dtx
\end{verbatim}

If you have a \texttt{docstrip.cfg} that configures and enables \texttt{docstrip}'s TDS installing feature, then some files can already be in the right place, see the documentation of \texttt{docstrip}.
3.4 Refresh file name databases

If your \TeX{} distribution (te\TeX{}, mik\TeX{}, ...) relies on file name databases, you must refresh these. For example, te\TeX{} users run texhash or mkte\TeX{}lsr.

3.5 Some details for the interested

**Attached source.** The PDF documentation on CTAN also includes the .dtx source file. It can be extracted by AcrobatReader 6 or higher. Another option is pdftk, e.g. unpack the file into the current directory:

```
pdftk settobox.pdf unpack_files output .
```

**Unpacking with \LaTeX.** The .dtx chooses its action depending on the format:

- **plain Te\TeX:** Run docstrip and extract the files.
- **\LaTeX:** Generate the documentation.

If you insist on using \LaTeX for docstrip (really, docstrip does not need \LaTeX{}), then inform the autodetect routine about your intention:

```
latex \let\install=y\input{settobox.dtx}
```

Do not forget to quote the argument according to the demands of your shell.

**Generating the documentation.** You can use both the .dtx or the .drv to generate the documentation. The process can be configured by the configuration file ltxdoc.cfg. For instance, put this line into this file, if you want to have A4 as paper format:

```
\PassOptionsToClass{a4paper}{article}
```

An example follows how to generate the documentation with pdflatex:

```
pdflatex settobox.dtx
makeindex -s gind.ist settobox.idx
pdflatex settobox.dtx
makeindex -s gind.ist settobox.idx
pdflatex settobox.dtx
```

4 Catalogue

The following XML file can be used as source for the \TeX{} Catalogue. The elements caption and description are imported from the original XML file from the Catalogue. The name of the XML file in the Catalogue is settobox.xml.

```
<?xml version='1.0' encoding='us-ascii'?>
<!DOCTYPE entry SYSTEM 'catalogue.dtd'>
<entry datestamp='$Date$' modifier='$Author$' id='settobox'>
  <name>settobox</name>
  <caption>Assigning dimensions of a box to a length register.</caption>
  <authorref id='auth:oberdiek'/>
  <copyright owner='Heiko Oberdiek' year='2000,2006-2008'/>
  <license type='lppl1.3'/>
  <version number='1.4'/>
  <description>
    Commands to assist the reuse of boxes (set up by \tt sbox</tt> or
    by the \tt lrbox</tt> environment); the \tt \settowidth</tt>
    commands behave similarly to the \tt \settowidth</tt> (etc.)
    commands. For example:
    \pre...
  </description>
</entry>
```
\newsavebox{\mybox}
\newlength{\mylength}
\sbox{\mybox}{Hello World}
\settoboxwidth{\mylength}{\mybox}
</pre>
<p>
The package is part of the <xref refid='oberdiek'>oberdiek</xref> bundle.
</description>
<documentation details='Package documentation'

<ctan file='true' path='/macros/latex/contrib/oberdiek/settobox.dtx'/>
<miktex location='oberdiek'/>
<texlive location='oberdiek'/>
<install path='/macros/latex/contrib/oberdiek/oberdiek.tds.zip'/>
</entry>
</catalogue>

5 History

[2000/02/11 v1.0]
  • First public release, written as answer in the newsgroup
de.comp.text.tex: “Die Hoehe von Minipages und Bild”

[2000/09/07 v1.1]
  • Documentation added.
  • CTAN release.

[2006/02/20 v1.2]
  • \setboxwidth, \setboxheight, \setboxdepth added.
  • Box move commands added.
  • DTX framework.
  • LPPL 1.3

[2007/04/11 v1.3]
  • Line ends sanitized.

[2008/08/11 v1.4]
  • Code is not changed.
  • URLs updated.

6 Index

Numbers written in italic refer to the page where the corresponding entry is de-
scribed; numbers underlined refer to the code line of the definition; plain numbers
refer to the code lines where the entry is used.
